Made in Turkey

The Montreal Eco Passenger Car Tire is a high-quality tire designed to offer exceptional performance while prioritizing environmental sustainability. Here are some of its notable qualities:

Eco-Friendly Materials: The tire is constructed using eco-friendly materials that minimize the environmental impact throughout its lifecycle.

Fuel Efficiency: The Montreal Eco Passenger Car Tire is engineered to enhance fuel efficiency. Its low rolling resistance design reduces the energy required to keep the tire in motion, resulting in improved mileage and reduced fuel consumption.

Excellent Traction: This tire delivers reliable traction on various road surfaces, including dry, wet, and even light snow conditions.

Durability: The Montreal Eco Passenger Car Tire is designed for long-lasting performance. It features a robust construction that resists wear, ensuring an extended lifespan.

Comfortable and Quiet Ride: The tire's construction includes features that enhance driving comfort. Its design helps absorb road vibrations, resulting in a smooth and comfortable ride.

All-Season Performance: This tire is engineered to perform well in various weather conditions. It maintains reliable traction and handling both in dry and wet conditions, while its siping and tread design provide grip on light snow-covered roads.

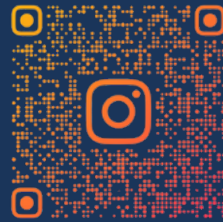

Safety Features: The Montreal Eco Passenger Car Tire incorporates safety features such as effective braking capabilities and enhanced stability during cornering. These qualities contribute to increased driver confidence and overall road safety.

Made in Turkey

The **MONTREAL ECO-2** tire is a high-quality tire designed specifically for HP, UHP, Sport utility vehicles (SUVs) and crossover utility vehicles (CUVs). It offers several notable qualities that make it an excellent choice for eco-conscious drivers:

Environmental-Friendly: The ECO-2 HP, UHP & SUV/ CUV tire is designed with a focus on reducing its environmental impact. It utilizes eco-friendly materials and manufacturing processes that help minimize carbon emissions and promote sustainability.

Fuel Efficiency: One of the key features of the ECO-2 tire is its excellent fuel efficiency. The tire's low rolling resistance design helps to reduce energy consumption, allowing for improved fuel economy. This feature not only saves money on fuel costs but also contributes to a lower carbon footprint.

Enhanced Traction: The tire is engineered to provide exceptional traction on various road surfaces and weather conditions. Its advanced tread pattern and innovative rubber compound offer excellent grip, promoting safety and stability, whether you're driving on wet, dry, or even light snowy roads.

Comfortable Ride: The ECO-2 tire is designed to provide a comfortable driving experience. It incorporates features such as a specially engineered tread pattern that helps to reduce road noise and vibrations, resulting in a smoother and quieter ride.

Longevity and Durability: This tire is built to last. Its construction includes durable materials and reinforced sidewalls that enhance its resistance to wear and tear. The ECO-2 tire's longevity ensures that you can enjoy its benefits for an extended period, making it a cost-effective choice.

The **MONTREAL Terra-X HT SUV & Light Truck** Tire is a high-quality tire designed specifically for SUVs and light trucks. It offers a range of qualities that make it a reliable and efficient choice for various road condition

Here are some of its notable qualities:

Durability: The Terra-X HT tire is built to last, with a rugged construction that can withstand the demands of off-road terrains and harsh driving conditions. It is resistant to cuts, punctures, and abrasions, ensuring long-lasting performance.

All-Season Traction: This tire provides excellent traction on both dry and wet surfaces. The tread pattern is designed to effectively channel water away from the tire, reducing the risk of hydroplaning and enhancing grip on wet roads. It also offers reliable traction on snowy or icy surfaces, making it suitable for year-round use.

Comfortable Ride: The Terra-X HT tire is engineered to deliver a smooth and comfortable ride. It features optimized tread block patterns and advanced tire technology that minimize road noise and vibrations, providing a quieter and more enjoyable driving experience.

Enhanced Handling and Stability: With its advanced design, the Terra-X HT tire offers improved handling and stability. It maintains precise steering response, allowing for better control and maneuverability on various road surfaces. This makes it an ideal choice for both city driving and highway cruising.

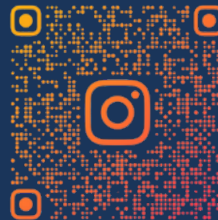

Fuel Efficiency: The tire's construction and compound are designed to reduce rolling resistance, which can help improve fuel efficiency. By minimizing the energy required to keep the tire rolling, it contributes to better gas mileage and reduces carbon emissions.

MONTREAL Commercial Light Van Tires are specifically designed for light commercial vans and deliver exceptional performance and reliability. These tires offer a range of qualities that make them an ideal choice for commercial van owners. **Here are some key features:**

Durability: MONTREAL Commercial Light Van Tires are built to withstand the demanding conditions of commercial use. They are constructed with sturdy materials and reinforced sidewalls to resist punctures, cuts, and impacts.

Longevity: These tires are engineered to provide a long tread life, ensuring that they can endure high mileage and extended use without compromising performance. They are designed to deliver excellent wear resistance, reducing the need for frequent replacements.

Load carrying capacity: Commercial vans often carry heavy loads, and MONTREAL tires are designed to handle the weight. They have a high load-carrying capacity, enabling efficient transportation of goods and equipment.

Traction and Grip: These tires offer superior traction and grip on both wet and dry surfaces. They feature specially designed tread patterns that enhance stability and provide reliable handling, promoting driver confidence and safety.

Fuel Efficiency: MONTREAL Commercial Light Van Tires are designed to optimize fuel efficiency. They minimize rolling resistance, which helps reduce fuel consumption, resulting in cost savings for commercial van owners.

Comfortable Ride: Despite their commercial-grade durability, these tires are designed to provide a comfortable and smooth ride. They are engineered to absorb road vibrations and minimize noise, enhancing driver and passenger comfort.

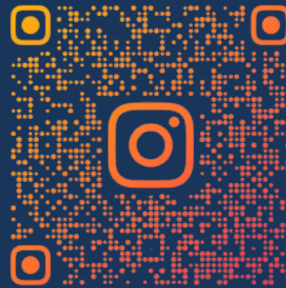

All-Season Performance: MONTREAL Commercial Light Van Tires are suitable for all seasons, including wet, dry, and winter conditions. They offer excellent performance in various weather conditions, providing reliable traction and control.
